EREN LABS

Blind inventory count sheet

Page 1: count physical stock without showing the expected quantity.

Store / location: _____ Date / time: _____

Count scope: _____ Counter: _____

SKU / barcode	Product / variation	Location	Counted	Notes

Before counting

Use one row per stock-managed SKU or variation. Identify the shelf or storage location.

Leave uncounted items blank. Enter 0 only when you have confirmed there is no stock.

Record orders, returns or deliveries during the count separately. Recount unexpected gaps.

EREN LABS

Inventory reconciliation sheet

Page 2: compare the count with the recorded starting stock after counting.

Store / location: _____ Date / time: _____

Count scope: _____ Counter: _____

SKU / variation	Expected	Counted	Difference	Unit cost	Cost difference

Manual calculation

Difference = counted - expected. Cost difference = difference x unit cost.

Use one currency and a consistent unit cost. Blank counts must stay out of totals.
